| Conversion ratio | | 5.20373 | | | |

Product description

Early Redemption Kick-in GOALS (Barrier Reverse Convertibles) enable the investor to earn a guaranteed coupon, while the redemption depends on the performance of the underlying. Early redemption of the product is possible if the closing price the underlying is equal to or above the early redemption level on pre-defined observation dates. The following scenarios apply:

- Scenario 1** If an early redemption event takes place, the product will be paid back at 100% of the nominal plus the pro-rata coupon on the next coupon payment date.
- Scenario 2** If no early redemption event takes place and the underlying does not touch or breach the barrier during the barrier observation period (no "Kick-In Event"), the investor will be paid back 100% of the nominal plus the coupon on the redemption date.
- Scenario 3** If the underlying touches or breaches the respective barrier during the barrier observation period ("Kick-In Event") and no early redemption event takes place, the redemption will take place as follows:
- 1) If the expiration value of the underlying is equal to or above the strike level, 100% of the nominal plus the coupon will be paid back.
 - 2) If the expiration value of the underlying is below the strike level, the investor will receive an amount that corresponds to the closing price of the underlying, under consideration of the conversion ratio. The coupon will be paid out in addition.

Definition "Early Redemption Event" An Early Redemption Event has taken place if, on one of the observation dates, the closing price of the underlying is at or above the early redemption level.

Definition "Kick-In Event" A Kick-In Event has taken place if the price of the underlying has touched or breached the barrier from (and including) the fixing date to (and including) the expiration date.

Definition "Expiration Value" Official closing price of the underlying on the expiration date.

All values and information correspond to the situation at the fixing date. The product documentation, i.e. the prospectus and the Key Information Document (KID), as well as information on opportunities and risks, is available under: ubs.com/keyinvest. Structured derivatives do not constitute participation in collective investment schemes. For this reason they do not require approval from the Swiss Financial Market Supervisory Authority (FINMA). As a result, investors are not entitled to the specific investor protection provided by the Swiss Collective Investment Schemes Act (CISA). Structured products are complex and involve a high risk. The intrinsic value of the investment instruments depends not only on the performance of the underlying asset, but also on the issuer's creditworthiness (credit risk), which can change over the duration of the product. In relation to any securities, currencies, financial instruments or other assets underlying a transaction to which this material relates, the values may fall as well as rise and past performance is not an indication of future performance. Before entering into any transaction, you should consult your own legal, supervisory, tax, financial and accounting advisors as you consider necessary. You should also make your own investment, hedging and trading decisions (including decisions regarding the suitability of this transaction) at your own discretion and based on your consultation with advisors as you consider necessary. Unless expressly agreed otherwise in writing, UBS does not act as financial advisor or fiduciary in any transaction. The terms and conditions of an investment are subject solely to the detailed provisions, including risk considerations, contained in the relevant product documentation. The product documentation, i.e. the prospectus and the Key Information Document (KID), can be obtained from the website keyinvest-ch-en.ubs.com, by entering the relevant Valor / ISIN. Before you invest in a product, please read the current prospectus and the Key Information Document (KID) carefully and thoroughly.
