Redemption

The Investor is entitled to receive from the Issuer on the Redemption Date an amount in the Settlement Currency, according to the following scenarios:

- Scenario 1 If the Expiration Value of all Underlyings is **at or above** the Cap Level, the Investor will receive the Maximum Redemption Amount multiplied by the Nominal.
- Scenario 2 If the Expiration Value of the Underlying is **above** the Initial Underlying Level and **below** the Cap Level, the Investor will receive a cash amount according to the following formula:

$$\text{Nominal} * \left[100\% + \text{Participation} * \left(\frac{\text{Expiration Value} - \text{Initial Underlying Level}}{\text{Initial Underlying Level}} \right) \right]$$

- Scenario 3 If the Expiration Value of the Underlying is **at or below** the Initial Underlying Level, the Investor will receive a cash amount according to the following formula:

$$\text{Nominal} * \left[\text{Max} \left(\text{Capital Protection}; \frac{\text{Expiration Value}}{\text{Initial Underlying Level}} \right) \right]$$

- Expiration Value Official closing value of the Underlying on the Expiration Date on the Related Exchange, as determined by the Calculation Agent.

Product Structure

The CPN is a note with an embedded call that enables the investor to achieve a participation in the Underlying up to a certain level ("Cap Level"). The Investor is participating with a leverage upside in the performance of the Underlying.

On the Redemption Date, the risk of loss is - subject to the credit risk of the Issuer - limited to the difference between the purchase price and the Capital Protection.

3. Significant Risks for Investors

- General risk warning Potential Investors should understand the risks associated with an investment in the Product and shall only reach an investment decision after careful considerations with their legal, tax, financial and other advisors of (i) the suitability of an investment in the Product in the light of their own particular financial, fiscal and other circumstances; (ii) the information set out in this document and (iii) the Underlying(s). The following is a summary of the most significant risks. Further risks are set out in the Product Documentation.
- Risk Tolerance Investors in this Product should be experienced Investors and familiar with both derivative products and the stock markets.

Product specific risks

- Loss Potential On the Redemption Date, the risk of loss is - subject to the credit risk of the Issuer - limited to the difference between the purchase price and the Capital Protection.
- Capital Protection (at Expiry) Yes. Moreover, Investors are exposed to the credit risk of the Issuer.
- Risk Potential in comparison to a direct investment in the Underlying The Capital Protection limits the risk exposure compared to a direct investment.
- Issuer Call right None
- Stop Loss Event None
- Extraordinary termination risk The Product contains terms and conditions that allow the Issuer to terminate and redeem the Product prior to the Redemption Date. In case of such extraordinary termination, the Issuer shall pay to the Investors an extraordinary termination amount as determined by the Calculation Agent which is usually equivalent to the market value of the Product. Potential Investors should note that the extraordinary termination amount may deviate from and may be considerably below the amount which would be payable pursuant to the final redemption provisions on the Redemption Date. Investors are not entitled to request any further payments on the Product after the termination date.
- Adjustment risk Potential Investors should be aware that it cannot be excluded that certain events occur or certain measures are taken (by parties other than the Issuer) in relation to the Underlying(s) which can lead to changes to the Underlying(s) or its concept (e.g. corporate events of a company whose shares constitute an Underlying, market disruption events or other circumstances affecting normal activities). In the case of the occurrence of such events or measures, the Issuer and/or the Calculation Agent are entitled to effect adjustments according to the Product Documentation. Such adjustments might have a negative impact on the value of the Product.

Illiquidity risk in secondary market	<p>The Issuer or the Lead Manager, as applicable, intends, under normal market conditions, to provide bid and/or offer prices for this Product on a regular basis. However, the Issuer or the Lead Manager, as applicable, makes no firm commitment to provide liquidity by means of bid and/or offer prices for this Product, and assumes no legal obligation to quote any such prices or with respect to the level or determination of such prices.</p> <p>Potential Investors therefore should not rely on the ability to sell this Product at a specific time or at a specific price. Potential Investors should note that prices quoted typically include a spread and therefore may deviate from the market value of the Product. In special market situations, where the Issuer is completely unable to enter into hedging transactions, or where such transactions are very difficult to enter into, the spread between the bid and offer prices in the secondary market may be temporarily expanded, in order to limit the economic risks of the Issuer. Hence, Investors might sell at a price considerably lower than the actual price of the Product at the time of its sale. By selling the Product in the secondary market Investors may receive less than the capital invested.</p> <p>In case of a secondary market transaction, there is a possibility that costs, including taxes, related to or in connection with the Product may arise for Investors that are not paid by the Issuer or imposed by the Issuer.</p>
Market Disruption risk	<p>Investors are exposed to market disruption events (such as trading disruption, exchange disruption and early closure of the relevant exchange), which could have an impact on the redemption amount through delay in payment, change in value or suspension of trading in the Product in the secondary market. For a detailed description of such events and their effects please refer to the Product Documentation.</p>
Withholding tax	<p>Investors in this Product should note that any payment under this Product may be subject to withholding tax (such as, inter alia, Swiss Withholding Tax, and/or withholding related to FATCA or 871(m) of the US Tax Code). Any payments due under this Product are net of such tax. Please refer to the General Terms and Conditions for detailed information. If the Issuer is required to withhold any amount pursuant to Section 871(m) or FATCA of the U.S. Tax Code, the Issuer will not be required to pay additional amounts with respect to the amount so withheld.</p>

Risk Factors relating to the Issuer

In addition to the market risk with regard to the development of the Underlying, each Investor bears the general risk that the financial situation of the Issuer could deteriorate. The Products constitute immediate, unsecured and unsubordinated obligations of the Issuer, which, particularly in case of insolvency of the Issuer, rank *pari passu* with each and all other current and future unsecured and unsubordinated obligations of the Issuer, with the exception of those that have priority due to mandatory statutory provisions. The general assessment of the Issuer's creditworthiness may affect the value of the Products. This assessment generally depends on the ratings assigned to the Issuer or its affiliated companies by rating agencies such as Moody's, Fitch and Standard & Poor's.

The Issuer Ratings indicated in this document reflect the situation at the time of issuance and may be subject to changes. The actual Issuer Ratings at any given time can be seen on the Issuer's website (www.ubs.com) under "Analysts & Investors".
